

## Grade and Evaluation

### Level guideline

The results are rated not by "pass/fail" criteria but by scores ranging from 0 to 800 and evaluated on a scale of six levels from J5 to J1+. The BJT is designed in such a way that an examinee gets about the same score each time he/she takes the exam so long as his/her proficiency is unchanged. This enables the examinee to track progress in small increments.

※The level guideline is one of the indexes showing how high ability the BJT score of an examinee represents. Please see it to get a rough idea.
